REGISTRATION HOURS

SATURDAY April 2	SUNDAY April 3	MONDAY April 4	TUESDAY April 5	WEDNESDAY April 6	THURSDAY April 7
2:30 - 6 p.m.	7 a.m. - 6 p.m.	7 a.m. - 7:30 p.m.	7 a.m. - 5 p.m.	7:30 a.m. - 5 p.m.	7 a.m. - NOON

REGISTRATION PRIVILEGES

ISRI offers several levels of registration to meet the needs of different convention attendees. The chart below can help you determine which events you can attend with your badge. If you wish to upgrade your badge, please visit the onsite registration desk.

*Exhibit Hall staff badge is only available to employees of exhibiting companies who are working in the company's exhibit area.

Registration Badge Type	ISRI Governance Meetings	Exhibit Hall Opening Gala April 4	Exhibit Hall April 5-6	ISRI Workshops & General Sessions	"Just for Fun" Programs	ISRI Materials ID Sessions April 7	Final Night Party
Full Registration	ISRI Members Only	Yes	Yes	Yes	Yes	Yes	Yes
Trade Show-Only	ISRI Members Only	No	Yes	No	No	Yes	No
Exhibitor	ISRI Members Only	Yes	Yes	Yes	Yes	Yes	Yes
Exhibit Hall Staff*	ISRI Members Only	Yes	Yes	No	No	No	No
Social Badge	ISRI Members Only	Yes	No	No	Yes	No	Yes

SPOUSES & GUESTS

In order for Spouses and Guests to participate in all aspects of the 2016 ISRI Convention and Exposition, including Workshops, General Sessions and the Final Night Beach Party, they must have a full conference registration badge. Spouses and Guests registered with the "Trade Show-Only" badges are welcome to enjoy the hospitality areas and to attend the events in the Exhibit Hall on Tuesday and Wednesday ONLY.

SOCIAL BADGE

The Social Badge Includes admission to the Opening Night Gala, the Final Night Beach Party, the Consumers Pub Crawl Reception, and the "Just for Fun" Programs. This badge does not allow for any other entry into the Exhibit Hall or any other General Sessions or Workshop Sessions.

CHILDREN'S ADMISSION POLICY

Children aged 2 to 16 must have a full conference registration to attend functions at the 2016 ISRI Convention and Exposition. Children not registered for the convention will be given the opportunity to visit the Exhibit Hall only after 2 p.m. on each day. Children should always be accompanied by a registered adult parent or guardian. Strollers are not permitted in the exhibit areas. Arrangements for day care or babysitting should be made by contacting your hotel concierge.

HOSPITALITY HOURS

Sunday 7 a.m. - 6 p.m.

Follow the happenings of ISRI2016 on Twitter and use #ISRI2016.

FIRST-TIME ATTENDEES WELCOME AND ORIENTATION

ISRI extends a warm welcome to the first-time attendees at this year's convention! Please join us at the First-Time Attendees Welcome and Orientation on Monday from 4 to 5 p.m. in rooms Reef E-F.

ADMISSION AND SECURITY

Your badge is your primary credential for all functions associated with the 2016 ISRI Convention and Exposition. You should have your badge and government-issued photo identification with you at all times when attending convention events. You will be asked to provide photo identification along with your badge credential at many events. Security personnel will enforce this requirement. Badges are not transferable.

SOLICITATION POLICY

ISRI's exposition was created for the convenience and benefit of contracted exhibitors. **Distribution of sales information and/or literature is restricted to contracted exhibitors and sponsors and to those who have a previously established agreement with the Institute of Scrap Recycling Industries Inc. that provides for these activities.** Those found to be in violation of this policy may be subject to removal from the Exhibit Hall and/or loss of convention credentials without compensation. In addition, ISRI has established "No Solicitation Zones" that include areas near the entrance to the Exhibit Hall and in the hallways outside of workshop rooms.

ISRI APP AND EDAILY

Download ISRI Mobile from the Apple Store or Google Play for all your convention needs. Receive important notifications and up-to-the-minute information. Also look for the Convention eDaily e-mail every morning with all your ISRI2016 happenings.

LOST (AND FOUND) ITEMS

Lost your glasses, keys, cell phone? Check with the ISRI Registration Desk. All items turned in to ISRI will be located there. If you have found an item, please take it to the ISRI Registration Desk or to any ISRI staff member. At the end of the day, all items will be turned over to Mandalay Bay Security located on Level 2 of the Convention Center.

WI-FI INTERNET ACCESS

Attendees who purchased Wi-Fi within their hotel room in any of the MGM Resorts properties will be able to use the same Wi-Fi throughout the convention center as well. *Note that this does not apply to the Four Seasons Resort.*

CELLULAR PHONES/ ELECTRONIC DEVICES

As a courtesy to our presenters, please turn off cellular phones and other electronic devices that may emit sounds during the programs.

HOW ARE WE DOING?

The ISRI Convention Committee wants your feedback. Committee members will be circulating throughout the week wearing special ribbons. If you have a comment or suggestions that will help make the convention a more valuable experience now or in the future, please let us know.

We welcome your comments in person or by e-mail at ISRIConvention@isri.org.

JUST FOR FUN AT ISRI2016

The primary agenda of an ISRI convention is about business, but there's more to us and our lives than just work. That's why ISRI created the "Just for Fun" program that brings workshops and other events that are more than just "spouse" programs. These programs are entertaining, educational, and informative to our lives outside the workplace. This year, ISRI offers two great programs.

Keeping Your Kids Safe from Cyberbullying and Other Online Threats

Kids today have to contend with threats and hazards that older generations never even thought of. With the proliferation of hand-held electronics, computers, tablets, and phones, kids are facing threats not only in the physical world, but in the virtual one as well. Parents unaccustomed to these threats are being left behind in their ability to help their kids navigate these choppy waters. **Tina Meier** is an internationally recognized speaker on bullying, cyberbullying, suicide awareness, and prevention. Her experience is personal, as she lost her own 13-year-old daughter to suicide over a fake cyber-relationship with someone she thought was a teen boy, but was instead a fictitious character made up by an adult neighbor and her teenage daughter. Hear her story and learn ways to help protect your own children.

WEDNESDAY, APRIL 6

10:30 a.m.
Wynn Las Vegas

A Day at Wynn Las Vegas

Travel with other ISRI guests to Wynn Las Vegas, the premier destination on the Las Vegas Strip. Guests will enjoy an exclusive viewing and presentation at Wynn Collection - A thoughtfully curated selection of head-to-toe fashion and accessories for men and women. Discover the finest from an international roster of A-list designers and sip champagne while hearing from experienced buyers about current styles at top fashion houses. Following the presentation, guests will delight in a patio luncheon steps away at The Country Club before returning to Mandalay Bay Resort. NOTE: Space is limited for this event. You can confirm your attendance by signing up at ISRI Registration. The tour will depart from the lower level valet entrance of Mandalay Bay at 10:30 a.m., sharp.

WHAT'S NEW ?

MORE EXCLUSIVE EXHIBIT HALL TIME — ISRI's Opening General Session moves to later in the day to give you exclusive time to visit with exhibitors and see the latest equipment, products, and services for the scrap recycling industry.

CONSUMERS RECEPTION IN THE EXHIBIT HALL — The consumers event moves to Wednesday afternoon in the Exhibit Hall. Meet your consumers in the various commodity hospitality areas, where ISRI will be serving craft beers and other beverages.

ISRI PLASTICS BUSINESS & OPERATIONS SUMMIT — Plastics have become a key commodity for many recycling operations — some solely handling plastic, others collecting and sorting along with other recycling operations. As leaders in plastics recycling, ISRI offers a complete program cycle dedicated to this important commodity.

ISRI TOWN HALL MEETING — Join ISRI Chair Doug Kramer, ISRI President Robin Wiener, and other elected leaders of the association for a Town Hall meeting — a chance to learn about ISRI's operations, to ask questions and share your opinions on present and future priorities of the association. This meeting is open to all individuals affiliated with ISRI Member companies. The Town hall will take place on Tuesday, April 5, 9 - 10 a.m. in Mandalay Bay Ballroom I on Level 2 of the convention center.

Virgin Resin Market Update

Plastics Business &

Operations Summit Track

Breakers K-L

Over the past several years, petroleum and petrochemical companies have discovered vast amounts of energy in the prairies of Montana and the Dakotas. The U.S. Energy Information Administration forecasts that growth in U.S. energy production—led by crude oil and natural gas—along with modest growth in demand will reduce U.S. reliance on imported energy supplies. This increased energy production will have a significant impact on several manufacturing industries that require natural gas as a feedstock. Hear experts from the energy industry and discuss how the increase in U.S. energy production will impact the production of virgin plastic resins. Plastic recyclers need to understand the prevail-

ing trends in virgin resin production because virgin and recycled resin prices are closely linked. Find out where we are and where we're headed—and arm yourself with information that will help you move past your competitors!

Moderator: Frank Esposito, *Crain Communications*

Speaker: Mark Eramo, *HIS*

Recycled Resin Market Update

Plastics Business & Operations Summit Track

Breakers K-L

The expanding capacity of virgin resin suppliers to produce cheap resins is putting the recycled plastics industry under great pressure. Virgin and recycled plastic resin prices are closely tied together, and the expansion of one may adversely impact the other. Understanding how these two markets are linked, as well as the prevailing trends in the industry, will help you develop a successful strategy to grow and expand. Together with the session on virgin resin markets, this session will give you an understanding of all the resin markets, where they are, and what you can expect in the future. Grow your business. Expand your knowledge base. Come to this session and develop the tools to succeed in an ever expanding commodity sector.

Increasing the Value of Your Existing Commodity Stream by Adding Plastic **Plastics Business & Operations Summit Track**

Breakers K-L

Continually expanding and diversifying the types of materials that come through the facility are a proven strategy for succeeding in a tough economic climate. Plastic is one of the fastest-growing commodities recyclers are working with, and some are finding enormous success. Join a growing segment of the recycling industry that recycles plastics. Learn the first steps on how to add plastic to your existing lines of business. Understanding how to do a bale audit and interpret the subsequent analysis can help you down that path of diversification.

Moderator: Maite Quinn, *Sims Municipal Recycling*

Setting Up a Collections System: **Getting Film Out of the Mix** **Plastics Business & Operations Summit Track**

Breakers K-L

Plastic polyethylene film is an easily sourced material, and it's in demand. Whether it's pallet shrink wrap, retail and grocery bags or film used to package white goods and appliances, PE is all around us. Many retailers have set up film collection programs and are looking for recyclers to recycle the material. In addition, manufacturers of plastic bags, plastic lumber and other products that require PE film are also interested in finding new sources. Whether you already recycle plastic or are looking to diversify your current commodity streams, come to this session and walk away with the know-how to start collecting PE film.

Speakers: Nina Butler, *Managing Director, Moore Recycling Associates*; Dave Heglas, *Director of Materials Resources, Trex Company, Inc.*; Phil Rozenski, *Sr. Director of Sustainability, Novolex*

Sourcing New Materials: How to Find Additional Sources of Supply **Plastics Business & Operations Summit Track**

Breakers K-L

The lifeblood of any recycling operation is its input of raw materials and the ability to find new sources of supply. Plastics in particular is a ubiquitous material that is all around us. Recycling this plastic is becoming more and more commonplace as recyclers add plastic to their existing lines of business. While these markets mature, some avenues of sourcing supply have become overly competitive. In this environment, where is a recycler to turn to find the feedstock needed to keep the business afloat? Hear from experienced veterans who recycle plastic and learn their strategies for finding new sources of feedstock materials. There are many unconventional and untapped markets for plastic materials, and this session will give you tips for opening up these markets.

Speakers: Joe Clayton, *MRP*; Jonathan Cohen, *President, Generated Materials Recovery*

**The Art of Maximizing Profit:
The Real-Life Stories of Certified Facili-
ties**

Certification Track

Lagoon K-L

Does saving over \$100,000 a year in workers compensation insurance seem appealing? This is the very quantifiable reality of one company's experience. This session is full of facts, figures, and details of how companies across several commodity groups have managed to keep more of their money as a result of their implementation of RIOS.™ It's always good to do the right thing for your employees and the environment, but in this session we will talk about the real money benefits of getting certified. With three very different perspectives and experiences, this session will arm you with the information that can help improve your company in these tough market conditions. Ask yourself, are you going to walk away from 32% insurance reductions?

Moderator: Jeremy Miller, *Wm. Miller Scrap Iron & Metal Co.*

Speakers: Brian Conners, *President, ARCA Advanced Processing LLC*; Corey Dehmey, *E11 Consulting, LLC*

Spotlight on Ferrous

Ferrous and Nonferrous Track

Mandalay Bay Ballroom F & E

In 2015, falling prices across the ferrous supply chain, including iron ore, ferrous scrap, and finished steel, have taken a toll on company bottom lines in recent quarters. What is the outlook for 2016? What is in store for the coming year, more of the same, steeper declines or a possible recovery? Join a panel of invited experts for a lively discussion about what to expect in the coming year.

Speakers: Greg Dixon, *CEO, Smart Recycling Management, LLC*; Demirhan Ekinci, *Chairman of the Board, Turkish Steel Exporters' Association*; Dave Keeling, *Director-Recycling, Steel Recycling Institute*

**Reducing Rejections and Increasing
Value: Understanding Plastics
Identification**

**Plastics Business &
Operations Summit Track**

Reef E-F

Ever wonder what the difference is between PET and HDPE and why different plastics are incompatible? Understanding these differences is vital for getting the maximum value and profit for the plastics you sell. This course is geared toward anyone involved with materials collection or recycling who needs help identifying different polymers and their uses, such as PET, HDPE, PP, HIPS and ABS. This course will give you the basics to understand these differences and how to reduce your bale rejections, increase your profit and maximize your revenue stream!

Speaker: Lou Tacito, *President, Plastics Forming Enterprises*

2:30 - 3:30 p.m.

PSI Chapter Meeting

Reef C

3 - 4:15 p.m.

**Improve Your Profits by Developing
Your Team**

Leadership Track

Breakers C-D

As commodity markets continue to contract, many recycling companies are looking to reduce their expenses by reducing their employment rolls. For the remainder of the staff, the psychological impact can be great, reducing both productivity and the company's profit margin. In this workshop, you'll learn how to lead a reduced team that may be suffering from contracted morale. Leading a team in this state is not for the faint of heart, but it can be done! Come to this workshop and learn how to lead a team, what to look out for and how to avoid the most common pitfalls along the way.

Speaker: Bob Brewer, *SMR*

Keeping Your Business Safe From Online Hacks, Threats, and Data Breaches Safety Track

Breakers H-I

The number of hacks and data breaches is increasing every year. Reports in the news of thefts of sensitive data seem to be a constant drumbeat. With the threats to businesses' data greater than ever, how do businesses defend themselves from the unending onslaught of hackers looking to steal data from unsuspecting business owners? Learning what these threats are and how to combat them is the first line of defense. Participating in this session will help you understand how to secure and lockdown your data. Don't be a victim. Learn how to keep your data safe.

Moderator: Brady Mills, *Director of Law Enforcement Outreach, ISRI*

Speaker: Matt LaVigna, *Interim President and CEO, National Cyber-Forensics & Training Alliance*

Recycling in the Middle East International Track

Breakers K-L

The United States is the largest exporter of recycled commodities in the world and exports materials to over 160 different countries worldwide. In recent years, recyclers have found the Middle East to be a burgeoning region and a destination of choice for their materials. Key export markets in this region have included Turkey and Saudi Arabia. In fact, according to ISRI's 2015 Scrap Yearbook, Turkey consumed 28 million metric tons of steel scrap. Join ISRI Chair Doug Kramer and a panel of noted experts as they discuss how to export to the region, how facilities in the region operate and what the markets may bear in the coming months.

Moderator: Doug Kramer, *President, Kramer Metals*

Speakers: Engr. Salam al Sharif, *BMR President/Sharif Group Chairman*; Mae Dela Cruz, *Manager, Sayed Metal*; Richard Mayenknecht, *Director of Metal Procurement, Ma'aden Aluminium*

Financial Strategies to Take Advantage of a Down Market Financial Track

Lagoon K-L

Over the past several months, declining prices and contracting demand have rocked the scrap recycling industry. In this uncertain economy, recyclers are looking for any advantage they can gain to keep their doors open. One strategy often overlooked is to use the tax code to gain this advantage. In this workshop you'll hear from tax experts who will reveal little-known portions of the tax code that can yield enormous gains.

Speakers: Timothy Kneen, *Chief Investment Officer, IFAM Capital*; David Spray, *President, Export Advisors*; Genevieve Weiner, *Gibson, Dunn & Crutcher LLP*

Spotlight on Nickel/Stainless Ferrous and Nonferrous Track

Mandalay Bay Ballroom I

China's slower economic growth and metal production overcapacity are putting pressure on the global stainless market. At the same time, the strong U.S. dollar is making U.S. exports less competitive and increasing competition from overseas suppliers of stainless scrap and stainless steel. What do all of these factors mean moving forward? Will there be an upturn in the nickel/stainless market any time soon? Join a panel of invited experts to discuss this in a wide ranging discussion about this material and what the remainder of 2016 has in store.

Moderator: Michael Friedman, *President, Sustainable Management*

Speakers: Robert Fig, *Head of Physical Market Sales, LME*; Adrian Gardner, *Principal Analyst, Wood Mackenzie*; Jim Lawrence, *Market Reporter, American Metal Market*

The Current State of DRI in the U.S. Ferrous Market Ferrous and Nonferrous Track

Mandalay Bay Ballroom K

Year by year, direct-reduced iron (DRI) is becoming a bigger and bigger issue for ferrous scrap processors and steelmakers alike. Scrap processors are concerned that DRI could substantially replace scrap in the steelmaking process. Steelmakers, particularly mini-mills, see DRI as a material that can help them meet their customers' growing quality demands. In this workshop you'll hear from experts about the current state of DRI and its impact on the ferrous market. As a ferrous processor, you'll need to understand how this material is impacting the ferrous market to remain competitive.

Moderator: David Borsuk, *Manager Industrial Marketing & Environmental Affairs, Sadoff Iron & Metal Company*

Speakers: Robert Hunter, *Midrex Technologies*; Michael Marley, *Vice President, World Steel Exchange Marketing*

Understanding Plastic Separation Systems Plastics Business & Operations Summit Track

Reef E-F

Separating plastic into feedstock quality commodity streams is a complex task that requires sophisticated equipment. Having the right tool for the right job is crucial if a recycling facility is to produce the quality bales the end user has contracted for. In this course, you'll get a primer on the types of separation systems that are used in a plastics recycling facility and how these systems work and operate. Additionally, you'll need to understand the "next big thing" if you are to stay ahead of the curve. In this session, you'll hear from equipment manufacturers and designers who are developing the next generation of equipment. Learn about their thought processes and what they do to ensure the recycling industry has the machinery it needs not only today, but years into the future. Come to this session and speak directly to the designers so your voice and thoughts are incorporated into the next generation of equipment.

Speakers: Heiner Guschall, *Managing Director, Sicon*; Felix Hottenstein, *Sales Director, MSS Optical Sorters*

4:30 - 5:45 p.m. Materials Recovery for the Future: Flexible Packaging and MRF Recovery Paper Track | Plastics Business & Operations Summit Track

Breakers C-D

The commodity stream continues to evolve as consumer packaging trends toward lighter, more innovative formats. As a result the recycling industry is continuously changing, and must be able to respond to shifts in the marketplace. This evolution can cause challenges for MRFs that have invested millions of dollars in equipment and other resources only to find materials that weren't anticipated when originally designed. The Materials Recovery for the Future Collaborative was formed by leading companies and trade associations from across the consumer goods industry to support research into MRF-based sorting solutions to recover flexible packaging. This Collaborative, the first of its kind in the U.S., is currently researching adaptive use of existing sortation equipment for flexible packaging sortation. The workshop will discuss how this material may be recovered and its impact on the overall commodity mix in the MRF.

Moderator: Susan Graff, *Vice President, RRS Corporate Sustainability*

Speaker: Diane Herndon, *Manager of Sustainability, Nestle Purina*

ASR Plastics: A New Opportunity for Auto Shredders

Plastics Business & Operations Summit Track

Mandalay Bay Ballroom K

For years, plastics coming out of auto shredders was prohibited from being used as a feedstock—until ISRI got involved. After a three-year effort on behalf of the recycling industry, ISRI petitioned the EPA to reverse its course and give permission for these plastics to be used in certain feedstock applications. Come to this session and listen to ISRI President Robin Wiener and Joe Pomykala of Alter Trading recount ISRI's advocacy on behalf of the recycling industry. With the door now open, the "sky's the limit" for forward-thinking recyclers who are interested in using and marketing this plastic feedstock. This session will show you how to integrate ASR into your existing commodity streams.

Speakers: Joe Pomykala, *Davenport Facility Manager and Acting ZD Facility Manager, Alter Trading*; Robin Wiener, *President, ISRI*

Leading by Example: Safety Leadership Leadership Track | Safety Track

Reef D

Developing safety leaders in your business can mean the difference between marginal and world-class results. It long has been accepted that successful programs push the responsibility for safety down into the organization, utilizing the power of many to foster a safe work environment. In most cases, this requires line supervisors and all employees to take on additional responsibility in an already stretched workforce. In this workshop we'll look at what we do in our operations to foster safety leaders at all levels.

Speaker: Kentis (Ken) Casto, *Occupational Safety and Health Administration (OSHA)*

How to Work With Your Banker in Tough Economic Times Financial Track

Reef E-F

The recent economic climate has thrown the recycling industry back on its heels. Now more than ever, you need to establish a strong relationship with your banker in order to keep your doors open. Hear from financial experts on what bankers are looking for and how you can give them the information they need to assuage any apprehension they may be feeling.

Moderator: Vincent Pappalardo, *Brown Gibbons Lang & Company*

Speaker: Andrew Pappas, *Managing Director, BMO Harris Bank, N.A.*

Understanding Rare Earth Metals Electronics Track | Ferrous and Nonferrous Track

Breakers H-I

If you are in the scrap metal or electronics recycling sectors you probably have some amount of rare earth metals (REM) passing through your facility on a regular basis. However, many people suffer lost opportunities because there is scarce knowledge about the items that contain REM.

The term rare earth metals is not a tip of the hat to the 1960s rock and roll band "Rare Earth" but rather comes from the fact that these elements are typically widely dispersed around the world and not often found concentrated as rare earth minerals in economically exploitable ore deposits. REM have unique magnetic, luminescent, and electrochemical properties. They are used in many of today's high tech products allowing for greater efficiency, performance, miniaturization, speed, durability and thermal stability as a result of reduced weight, reduced emissions, and energy consumption. There are 17 elements that are considered to be rare earth elements—they are the lanthanides: lanthanum, cerium, praseodymium, neodymium, promethium, samarium, europium, gadolinium, terbium, dysprosium, holmium, erbium, thulium, ytterbium and lutetium plus two others outside the lanthanides that behave similarly: scandium and yttrium.

Although there are not many facilities currently that are capable of recovering REM, scientists believe we may be on the verge of a breakthrough in technology that will make recovery of REM much more cost efficient. This program is designed to introduce you to the world of REM and to give you a sense of the ongoing research and the future of the markets for REM.

Moderator: David Waggoner, *Director of Environmental Management, ISRI*

Speakers: Corby Anderson, *Harrison Western Professor, Kroll Institute for Extractive Metallurgy*; Clint Cox, *The Anchor House, Inc.*

Spotlight on Tires: Market Creation and Innovation

Tires & Rubber Track

Breakers K-L

Tire recyclers are never complacent about the markets they sell their feedstocks into. The urge to develop markets and to continuously drive innovation is in the tire recycler's DNA. In this workshop you'll hear from leaders in the industry who are pushing the boundaries of the scrap tire market. From developing new markets for crumb rubber to mixing crumb rubber with plastic, this workshop will show you what is possible and how you can take advantage of these advances for your operations.

Moderator: Mary Sikora, *Scrap Tire News*

Speaker: Steve Bigelow, *Liberty Tire Recycling*

Spotlight on Electronics Electronics Track

Mandalay Bay Ballroom I

The "Spotlight on Electronics" is the kick-off session for the electronics recycling program track. The chair of the ISRI Electronics Division will provide an overview of the electronics recycling program and the ISRI Electronics Division and then introduce the guest speaker, Adam Minter, who will address global commodity markets, electronics recycling in the developing world, and other industry trends.

Moderator: Jim Levine, *Regency Technologies*

Speaker: Adam Minter

How Sustainability, Paper, and Plastic Recycling Can Help Shape a Better World

Paper Track | Plastics Business & Operations Summit Track

Reef D

It is often said that paper and plastics recycling is good for the environment as it conserves resources, reduces the carbon footprint of the industries that use recycled materials and helps preserve natural spaces. However, have you ever thought of the practical and real world impact that recycling has on the global community? In this session, you'll hear from speakers that are using recycling as an agent of change and helping to improve the lives of people all around the world. Come to this session and learn how recycling is preserving the environment, lifting individuals out of poverty and reducing the carbon footprint while at the same time helping entrepreneurs start companies that provide well-paying jobs to communities all around the world.

Moderator: Robin Wiener, *President, ISRI*

Speakers: Mike Biddle, *Material Solutions*; Karen McDaniels, *XSProject Indonesia*; Surendra Borad Patrawari, *Gemini Corporation*

Spotlight on Paper: Addressing Paper Bale Quality

Paper Track

Reef E-F

For the past year ISRI's Paper Division has been updating and revising its scrap paper specifications. Out of this effort came questions on how the industry can address bale quality. Paper Division members continue to debate such questions as "What does quality mean?" and "Should there be a certification regime available to paper recyclers?" This workshop will open a dialogue among members of the paper recycling industry who are impacted by this issue. Through this dialogue, the Paper Division will develop tools and materials to help paper recyclers make better bales. Participating in this workshop is your opportunity to have your voice heard.

Moderator: Johnny Gold, *The Gold Group*

Speakers: Myles Cohen, *Pratt Industries, ISRI Paper Division Chair*; Sandy Rosen, *Great Lakes Recycling, ISRI Paper Stock Industries Chapter President*

How to Make Money In Plastics Recycling

Plastics Business & Operations Summit Track

Breakers C-D

Recycling plastics is like recycling any other commodity — it takes a keen understanding of the markets, material and equipment to succeed, grow and thrive. Over the past several years many recyclers have successfully made the jump into plastic. Their efforts have paid off in that they are now more diversified, handling more materials, and in a better position to weather the ups and downs of individual market sectors. In this session, you'll learn how plastics recyclers can optimize their profitability by objectively analyzing the dynamics of plastics supply, quality, and market prices. You'll hear from experts in measuring and enhancing the profitability and environmental benefits of recycling and learn from a recycling champion at a long-running plastics recycler. If you're looking to add plastic to your commodity stream, or are just looking for an answer to help your business stay afloat in these difficult market conditions, you'll want to attend this session.

Moderator: Pamela Gordon, *CEO, Technology Forecasters, Inc.*

Speakers: Andrew Ferguson, *Environmental Committee Chair, International Association of Plastics Distributors*; Ramesh Srinivasan, *Eco-Catalyst, Inc.*

The Lead-Free Copper Alloy Debate

Ferrous and Nonferrous Track

Breakers K-L

Lead-free copper alloys are replacing leaded ones in potable water plumbing fixtures, but what will happen when these newer metals are scrapped? Some say they'll create massive problems for ingot makers, smelters and mills, while others say processors and consumers can find a solution together. In this workshop you'll hear from experts who will discuss the problems and possible solutions to this issue. As a copper recycler, you cannot afford to miss this session. Understanding what to expect in a rapidly changing marketplace is key if you are to remain competitive.

Moderator: Chris Greenfield, *Federal Metals Company*

Speaker: Adam Estelle, *Project Engineer, Copper Development Association Inc.*

Challenges and Issues In Electronic Recycling

Electronics Track

Mandalay Bay Ballroom I

This session is a panel discussion on current challenges and issues in electronics recycling — e.g., CRTs, commodities, EPR, property rights, certifications, etc. The panelists are industry executives with knowledge of the issues and represent different sectors and/or sizes of companies in the industry.

Moderator: Peter Bennison, *Regional Computer Recycling & Recovery*

Speakers: Joe Clayton, *MRP*; Lane Epperson, *HITECH ASSETS INC.*; Jim Levine, *Regency Technologies*; Bill Long

The Increased Use of Aluminum In the Automotive Industry and Its Impact on Recycling

Ferrous and Nonferrous Track

Mandalay Bay Ballroom K

Throughout the world, the automotive industry is looking for ways to make vehicles that are lighter, perform better and are more durable than their predecessors. To do this, many automakers are turning to aluminum to fulfill their needs. This increased appetite for material will surely impact the aluminum markets for years to come. In this climate, nonferrous processors can ill-afford to miss an emerging trend and be left behind. In this workshop, you'll hear from U.S. and global experts on aluminum demand in the automotive industry and how it could affect your operations and ability to source and trade this very important commodity.

Moderator: Matt Kripke, *Kripke Enterprises Inc.*

Speakers: Mohan Agarwal, *Managing Director, Century Metal Recycling Private Limited*; Mark DiFalco, *Manager, KPMG LLP*; Vince Pavlak, *Partner-Advisory, KPMG LLP*

More Than Just Tires: Understanding EPDM, Nitrile, and Butyl Rubber Recycling

Tires & Rubber Track

Reef D

Scrap tire recycling is a mature market that is well understood by longtime tire recyclers, but there are other forms of rubber that can be recycled and successfully placed into the marketplace. Among these are ethylene propylene diene monomer (EPDM), nitrile, and butyl rubber. In this workshop you'll hear how these materials are currently being recycled and learn about the markets that can accept them. If you're a recycler and looking to expand your commodity streams,

recycling these materials may be your opportunity to increase your profits and provide additional services to your clients that other recyclers just can't match!

Moderator: Bill Schreiber, *Technical Director Plastics, Lehigh Technologies*

Speakers: Thomas Hutchinson, *Hutchinson Design Group, Ltd.*; Tom Rosenmayer Ph.D., *Vice President, Lehigh Technologies*

Safety Hazard Recognition Safety Track

Reef E-F

In order to keep people safe you need to know what to look for. Having a trained eye is the key to ensuring you and your employees go home intact every day. This lively and interactive session will cover hazard identification, hazard assessment, hazard prevention and hazard control. Join ISRI Safety Outreach Directors Joe Bateman and Tony Smith as they walk through real world scenarios and share key tips and cost saving opportunities to help make your scrap recycling facility a safer environment to operate in.

Speakers: Joe Bateman, *Safety Outreach Director, ISRI*; Tony Smith, *Safety Outreach Director, ISRI*

10:30 a.m. - 3 p.m. Just for Fun - A Day at Wynn Las Vegas

Wynn Las Vegas

Travel with other ISRI guests to Wynn Las Vegas, the premier destination on the Las Vegas Strip. Guests will enjoy an exclusive viewing and presentation at Wynn Collection — a thoughtfully curated selection of head-to-toe fashion and accessories for men and women. Discover the finest from an international roster of A-list designers and sip champagne while hearing from experienced buyers about current styles at top fashion houses. Following the presentation, guests will delight in a patio luncheon steps away at The Country Club before returning to Mandalay Bay Resort. **NOTE: Space is limited for this event.** You can confirm your attendance by signing up at ISRI Registration. The tour will depart from the lower level valet entrance of Mandalay Bay at 10:30 a.m., sharp.

11:30 a.m. - 12:45 p.m. The ABC's of Exporting Plastic Plastics Business & Operations Summit Track

Breakers C-D

In 2014, the United States exported \$947 million of plastic scrap to over 85 countries. With plastic exports being a major driver of the plastic recycling industry, recyclers need to stay up-to-date on events happening around the world and the prevailing trends in these markets. Come to this session and hear from experts on what is happening

overseas and where these markets are headed. Additionally, the session will review a basic primer on how to export and what recyclers should be aware of when doing so.

Speakers: Ted Kaiser, *Dock 7 Materials Group, LLC*; Hamilton Wen, *Director, Newport CH International*

Understanding the Importance of Human Resources for Your Company Business Operations Track — Human Resources

Breakers H-I

The role of the human resources manager is poorly understood in many companies in the scrap recycling industry. The position is often an "add on" for individuals with other jobs, such as office administration, payroll or health and safety. But when the position is properly developed and administered, the human resources manager can provide a wealth of knowledge and compliance guidance to a company. Understanding compliance, how to hire and fire employees, benefit administration and other tasks are vital if a company is to not only stay on the right side of the law, but ensure the workforce is as productive as possible. In this workshop, you'll learn all that goes into being a human resources professional and how this role can positively impact a company's bottom line.

Moderator: Olga Zamora, *VP of Human Resources, ISRI*

Speaker: Brandi Harleaux, *South Post Oak Recycling Center*

Spotlight on Copper Ferrous and Nonferrous Track

Mandalay Bay Ballroom F & E

The copper market has exemplified how commodity prices, market fundamentals, and the economy have become increasingly disconnected. Worries about dwindling Chinese demand for copper and copper scrap has had an outsized impact on copper process, along with concerns about the rising dollar and broad weakness across the commodity spectrum. As with other commodities, scrap recyclers are concerned about what 2016 will hold. Will it be more of the same, a recovery, or an even deeper decline? Join a panel of invited experts for a lively discussion about what to expect in the coming year.

Moderator: Randy Goodman, *Executive Vice President, Goodland (America) Inc.*

Speaker: Adam Minter; Joseph Pickard, *Chief Economist, ISRI*

Implications of Changes to the Electronics Recycling Industry Electronics Track

Mandalay Bay Ballroom I

Industry leaders will address the trends and challenges to electronics recycling

in the future and their implications to the industry. Product segments include consumer electronics, mobile and wearable devices, IT/computer, and telecom. Some of the changes facing the industry are small, complex devices, design for recycling, materials (no more focus materials?), costs, values (e.g., resale vs. scrap value), right to repair/reuse, etc.

Moderator: Jade Lee, *Supply-Chain Services, Inc.*

Speakers: Walter Alcorn, *Consumer Technology Association*; Joe Morrow, *Belmont Trading*; Kyle Wiens, *iFixit*

RIOS™ Certification and Paper Recycling Certification Track | Paper Track

Reef D

RIOS™ is like diet and exercise. The more you put into it, the more you get out of it. Just like any major diet and exercise regimen, it requires hard work and a major lifestyle change to see lasting results. Any company that embraces RIOS™ would get its ISRI membership cost back dozens of times over, but, like those exercises, it's a massive commitment to lifestyle change. It's an all or nothing deal; you can't just try it out and see how it works. You have to go all in and the decision has to come from the top. This workshop will demonstrate to paper recyclers how RIOS™ can save thousands of dollars in reduced rejections, higher quality and bigger and more robust profit margins.

Moderator: Darrell Kendall, *Director of RIOS™, ISRI*

Speakers: Sarah Cade, *President, PC Rebuilders & Recyclers*; Johnny Gold, *The Gold Group*

Responding to Myths About Tire Recycling Tires & Rubber Track

Reef E-F

The past year has been grim for tire recycling. In 2015, there was a multitude of media stories and articles reporting alleged links between adverse health effects and the use of crumb rubber in sports fields and other places. Despite the overwhelming science disproving these claims, the rumors persist. How then, do tire recyclers and other stakeholders dispel the myths and make sure the science is reported accurately? In this workshop, ISRI's Mark Carpenter, Senior Director of Media Relations and Online Communications, will discuss what ISRI is doing to beat back the tide of false claims and to help recyclers respond to questions they are fielding from their customers.

Speakers: Mark Carpenter, *Senior Director of Media Relations and Online Communications, ISRI*; Al Garver, *President, Synthetic Turf Council*; Michael Peterson, *Toxicologist, Gradient*

Emerging Opportunities and Exploring
Niche Plastics
Plastics Business &
Operations Summit Track
Breakers C-D

The term “unrecyclable plastic” is a misnomer, and plastics so labeled are in fact being recycled successfully. In this session, we’ll explode the myths about the recyclability of three types of “unrecyclable plastics”—agricultural plastic film, carpet and PVC. All of these plastics have found very successful niches for the recyclers who have figured out the proper mix of time and attention to making it work. This session will arm you with information to help you tackle “unrecyclable plastics” and gain a foothold in markets that heretofore have not been fully explored.

Speakers: Troy Burgess, *CEO, Central States Reprocessing, LLC*; Gene Jones, *CEO, Southern Waste Information eXchange, Inc. (SWIX)*; Ed Pilpel, *President, Polystrand*

Conscious Leadership
Leadership Track
Breakers K-L

Getting the most out of your team takes an understanding of what motivates them as a group and individually. Whether its praise, dealing directly with a problem or a combination of both, all team members respond differently. Looking at people as something to be managed misses the point—people aren’t managed like numbers and functions. Add to that the idea of how it feels to be managed, and you’ll start to get resistance from the very people on which you rely to get the job done. Conscious Leadership is a concept that can be used to identify what motivates your team to do their best work. Sales and management expert Judy Ferraro will share stepping stones of creating a healthy work environment that will move your team to up their game and improve their productivity.

Speaker: Judy Ferraro, *President, Judy Ferraro & Associates*

Spotlight on Aluminum
Ferrous and Nonferrous Track
Mandalay Bay Ballroom F & E

The aluminum markets are experiencing a great amount of change and making sense of it all can be a daunting challenge. Pressures on the market such as downward economic currents, the strengthening U.S. dollar, and weak aluminum premiums, prices, and production have only added to this confusion. Will the remainder of 2016 show vibrancy and rebound or will it be more of the same? Join a panel of invited experts to discuss these issues for an interesting and timely conversation about this material and what you can expect for the remainder of the year.

Speaker: Murat Bayram, *EMR*

Evolving Opportunities for
Electronics Recycling
Electronics Track
Mandalay Bay Ballroom I

This session will look at opportunities for the electronics recycling industry in some non-traditional markets/sources; e.g., automotive, medical, and cable. The speakers are from these industries and will address what they are doing now and what the outlook is?

Moderator: George Hinkle, *President, ARCOA*

Speakers: Tony Lively, *ZRG, LLC*; Jose Joaquin Santos, *Managing Director, Camacho Glass Recycling*

Keeping Safe at Work! A Briefing on
Workplace Violence and Active Shooters
Safety Track
Reef D

This module is designed to discuss the issue of workplace violence, as well as building/workplace safety. Topics to be covered in this module will include assessing danger, understanding the mental changes in the brain during an active shooter event, avoiding mental lapses before and during threats, behaviors of concern in the workplace, mentality of an active shooter, and rapid response. Body language in aggressors will be covered.

Moderator: Brady Mills, *Director of Law Enforcement Outreach, ISRI*

Speaker: Lt. James Perez, *Fairfield Police Department*

Comparative Techniques for Textile
and Tire Fiber Recycling
Tires & Rubber Track
Breakers E-F

Over the past year, ISRI has been working on ways to create markets for tire fiber and other textile materials that are the byproduct of the tire shredding process. As a result, ISRI has developed and published a landmark economic study that categorizes the amounts of textile material available for recycling and the approximate size of the potential market. ISRI is now working with the Carpet America Recovery Effort to better understand how scrap textile materials are collected and recycled. In this workshop, we’ll further the dialogue with CARE and explore how textile materials are recycled and how these techniques can be adapted to the tire recycling industry. If you’re a tire recycler, you can’t afford to miss this workshop. Learn how to develop the tire fiber market and how to turn a cost center into a profit center!

It's Game Show Time: A More Exciting Way to Understand Certification Certification Track

Breakers H-I

Presented in a witty, fun, answer-and-question game-show format, this primer on certification will not only entertain you, but it will also present the basics of QEHS certification. The session will cover the process that your facility would go through, the financial benefits it will earn, and the EHS improvement you will experience. Guaranteed to be the most engaging and exciting session at ISRI2016, it will also prove to be the start to a game-changing decision for your company.

Moderator: Rike Sandlin, *HiTech Assets*

Speakers: Darrell Hogan, *AER Worldwide*; Darrell Kendall, *Director of RIOS™, ISRI*; Tom Knippel, *VP Ferrous Sales, SA Recycling*

A Rising Tide: The Growth of the Indian Scrap Market Ferrous and Nonferrous Track

Breakers K-L

India is one of the fastest growing economies in the world and is one of the major destinations for U.S. ferrous scrap. On both the ferrous and nonferrous side, there may be several situations that are holding the country back from explosive growth: a lack of a formal recycling infrastructure and a growing black market within the secondary metals industry. How policy makers confront these problems and continue to spur the growth of their markets is the question that is on the minds of all India watchers. This session will explore this situation and help recyclers make sense of it. India is a market that can help recyclers replace other markets that are not performing as they once were. Come to this session and learn all about Indian ferrous and nonferrous scrap markets and how you can find an opportunity that you may not have thought of.

Moderator: Alexandre Delacoux, *Director General, Bureau of International Recycling*

Speakers: Sunil Barthwal, *Joint Secretary, Ministry of Steel*; Zain Nathani, *Nathani Group of Companies*; Dhawal Shah, *Managing Director, Metco Marketing India Pvt. Ltd*; SK Tripathani, *Chairman and Managing Director, MSTC Limited*

Putting Out the Fire: Crisis Communications Before, During, and After It's Needed Business Operations Track — Communications

Lagoon K-L

No matter how hard you try to avert crisis, sometimes it is unavoidable. Recyclers constantly have to deal with issues surrounding worker safety, metals theft, human resources, government regulations, and other areas that have the potential to lead to crisis. Knowing how to manage a crisis—from planning before it happens to the aftermath and follow up—could save your business if and when disaster strikes. This workshop will provide the tools to help you effectively communicate with employees, customers, media, and others in crisis situations.

Speakers: Mark Carpenter, *Senior Director of Media Relations and Online Communications, ISRI*; Jim Levine, *Regency Technologies*; Lt. James Perez, *Fairfield Police Department*

Increasing Purity of Nonferrous Scrap by Using a Vibratory Feeder Ferrous and Nonferrous Track

Mandalay Bay Ballroom K

Advances in sorting technology have greatly improved our ability to identify materials and their levels of purity—what was acceptable in the past is no longer adequate. What if the purity of your material could be further improved by simply changing the vibratory feeder in front of your sorter technology? In this workshop, you'll learn about vibratory feeders, what they are, how they work, and how they can improve the quality of your material. These advancements can help you retrieve more of the materials you want and sort out the contaminants you don't.

Speaker: Dick Reeves, *Market Director, General Kinematics*

The Invisible Threat: Five Essential Questions of Fatigue Risk Management Safety Track

Reef D

Culturally, it's taboo to sleep on the job. Consequently, most people who succumb to fatigue don't or can't admit it. This phenomenon forms an invisible threat to operations. That is to say, incident reports often cite "operator error," "unknown human factor," or some other ambiguous, or inaccurate root cause. Because the threat is invisible it is difficult to measure. Participants will develop an appreciation for fatigue risk and take away the five essential questions of fatigue risk management.

Speaker: Mitch Cowart, *Marketing Consultant, Caterpillar Safety Services*

10:15 - 11:45 a.m.

Materials ID: Hand-held Analyzers Business Operations Track — Operations

Mandalay Bay Ballroom D

The scrap industry is undergoing a transformational change in the types of equipment being used to identify and sort materials coming into the scrapyards. With the introduction of hand-held analyzers, scrapyards have a tool that can help them quickly and easily identify and sort material. While operating a handheld analyzer may be as simple as "point and shoot," there are many steps involved in the process before, during and after identifying the material. This course will step participants through the items they need to know about loading the proper library into the analyzer, how to prepare the material, the differences between the types of analyzers available and many other aspects operators should be aware of. Participants will walk away from this session with a greater understanding of the hand-held analyzer and how to operate it.

Speaker: Jim Pasmore, *Analytical Services and Testing*

11:45 a.m. - 1 p.m.

EHS AUDITING — Don't Let It Scare the SCRAP Out of You!

Business Operations Track — Operations

Beakers H-I

As operators of auto shredders are well aware, it can be daunting to comply with EPA regulations and those of other regulatory bodies. What's worse is that any infraction of these regulations can cause significant downtime and thousands of dollars levied in fines and other punitive measures. Consider getting help in the process from an attorney, who would be able to better manage and protect communications and documentation from disclosure. Those efforts play a critical role in protecting a company in many scenarios, including potential enforcement actions, transactions, state and federal audit programs, and complaints from neighbors. The content of poorly written and draft documents, or other communications based on incomplete information, can include highly problematic language. Such documentation might confirm or suggest violations or corrective actions that were not performed, and those can lead to significantly higher costs to perform, as well as penalties and fines. In this workshop learn what role an attorney can play and also hear from experts regarding new regulations being developed by the EPA.

Moderator: David Waggoner, *Director of Environmental Management, ISRI*

Speakers: Scott Miller, *Chief Corp Counsel SHEC/Cmpl, Sims Metal Management*; Earl Phillips, *Robinson & Cole LLP*

How to Use a Hedging Strategy to Come Out on Top Financial Track

Lagoon K-L

Developing a hedging strategy to take advantage of the vagaries of the marketplace will help you succeed and thrive where others have failed. The key to using these strategies is understanding what they are and how they work. Learn what hedging is and get a crash course on the proper ways to use it so you can come out on top!

Moderator: Joseph Pickard, *Chief Economist, ISRI*

Speakers: Kurt Fowler, *Senior Manager — Americas, The Steel Index*; Spencer Johnson, *Risk Manager, INTL-FC Stone*

Severing the Relationship: Complying With Unemployment Regulations Business Operations Track — Human Resources

Reef E-F

As the economy continues to slide, many companies are being forced to reduce their workforce just to keep the doors open. These actions however, have significant regulatory and personnel issues attached to them. Understanding the employer's role in unemployment insurance, health insurance and other regulations is critical to ensuring the separation is done correctly, allowing both parties to walk away unscathed. In this workshop you'll hear from experts on these issues and on how you can ensure your company is protected while at the same time doing the right thing for those who are let go.

Moderator: Olga Zamora, *Vice President, Human Resources, ISRI*

Speaker: Gary Marx, *Marx and Lieberman, PLLC*

Noon - 1:30 p.m.

Materials ID: Aluminum ID Business Operations Track — Operations

Mandalay Bay Ballroom D

Getting back to basics, learn how to identify the various insert grades of aluminum that recyclers typically come in contact with. The course will demonstrate various techniques for identifying aluminum and the best ways to utilize these techniques.

Speakers: Jeff Arrow, *Vice President Purchasing, TST INC.*; Jim Pasmore, *Analytical Services and Testing*

1:45 - 3:15 p.m.

**Materials ID: Copper ID
Business Operations Track — Operations**

Mandalay Bay Ballroom D

Copper, copper, and more copper! Recyclers come into contact with various grades of copper every day. This demonstration will demonstrate key techniques to identify copper and the best methods to do so.

Speakers: Jim Lawrence, *American Metal Market*; Jim Pasmore, *Analytical Services and Testing*

2 - 3:15 p.m.

**Selling Has Nothing to do With Selling
Financial Track**

Breakers H-I

Most sales organizations are very good at a game no longer being played. They have perfected the ability to consistently hit the target; the problem is that it is the wrong target in today's new economy. The way customers buy, select suppliers, build relationships, and view sales people has dramatically changed with the internet. Yet most have sales organizations continue to sell as if they were in a quaint Norman Rockwell painting. Learn about alternative sales strategies for your sales team that helps minimize commoditization, reduce long selling cycles, and decrease rampant sales force inefficiencies.

Speaker: Richard Farrell, *Tangent Knowledge Systems*

Human Resources**

Breaks K-L

As an employer, you must inform employees of their options under COBRA and Obamacare when they leave. In this session, we will discuss how to utilize Obamacare to reduce or eliminate risk. We will also explore how to optimize your HR department exit information process.

Speaker: Joe Appelbaum, *President, Potomac Companies, Inc.*

3:30 - 5 p.m.

**Materials ID: Nickel/Stainless ID
Business Operations Track — Operations**

Mandalay Bay Ballroom D

Participants will learn the basics of identifying the various grades of nickel/stainless that recyclers typically come in contact with. The course will demonstrate various techniques for identifying nickel/stainless and the best ways to identify these techniques.

Speakers: Jim Lawrence, *American Metal Market*; Jim Pasmore, *Analytical Services and Testing*

3:30 - 5:30 p.m.

Board of Directors Election

Mandalay Bay Ballroom I

7 - 10 p.m.

ISRI Final Night Beach Party

Mandalay Bay Beach

Join us as we network with friends and colleagues with music, food, dancing, and more at the Mandalay Beach. The evening is sure to be one of ISRI's best celebrations.

Donated by Roll-Rite LLC (Booth 955)

VALUE: \$6,167.50

Bidding starts at \$1,500

Advertisement in American Recycler Newspaper

1/4 page advertisement (5 x 6.25 in.) in both print and digital format in three (3) issues: June, July and August 2016.

Donated by American Recycler News

VALUE: \$2,181

Bidding starts at: \$375

Soda Can Can-imals

These fun figurines are the ultimate eco-friendly decorations! They are hand-made in Kenya from recycled aluminum cans and bound with unused telephone wires. Each soda can animal is made entirely by hand, providing income and creative recycling solutions in a country where recycling is rare.

Donated by Robin Wiener and Doug Kramer

VALUE: \$248

Bidding starts at: \$100

One Full-Page, 4-Color Ad in Recycling Today

This full-page four color ad will run in a non-premium location in an issue of the buyer's choice. The ad cannot replace an existing scheduled ad or program and will not count toward a paid frequency rate.

Donated by Recycling Today Magazine (Booth 1361)

VALUE: \$4,576

Bidding starts at: \$1,000

The 2016 American Music Awards

Guests will receive a two night stay at a downtown Los Angeles hotel and two (2) tickets to the 2016 American Music Awards to be held at the Microsoft Theatre, L.A. Live in Los Angeles. The tentative date of the show is November 20, though that date is SUBJECT TO CHANGE!!

Donated by the Los Angeles Tourism and Convention Board

VALUE: \$2,800

Bidding starts at: \$750

Shredder — Onsite Infeed Control Training

Who's protecting your shredder? This onsite training is open to your shredder operators, inspectors, managers, key suppliers, or all of the above, from one person to a class of 250. Your call. The class can be tailored to your needs, from a company shut down for a training class to an one (1) hour class twice a day before and after the work day. Experience hands on training going through inbound materials looking for noncompliance materials. Let's close the gap between performance and knowledge!

Donated by Industrial Environmental Consultants

VALUE: \$4,777

Bidding starts at: \$1,000

One Full-Page, 4-Color Ad in SCRAP Magazine

This ad will run in a non-premium position in one of SCRAP's remaining issues of 2016 (May/June; July/August; September/October; November/December). The ad cannot replace a paid position in a current ad program. Client must provide final ad based on SCRAP ad specifications.

Donated by SCRAP Magazine (Booth 2225)

VALUE: \$3,500

Bidding starts at \$750

Queen of Hearts

Chain link heart with masquerade masks and crown.

Donated by Tucson Iron & Metal

VALUE: \$500

Bidding starts at: \$75

Procedures

The Recycling Research Foundation's charity silent auction will be held adjacent to the ISRI Booth, located within the Exhibit Hall. The auction opens at 5 p.m. Monday, April 4 and closes at 2:30 p.m. on Wednesday, April 6.

For most items, winners will be announced by 4 p.m. on Wednesday, April 6. Signs listing the prizes and winners will be posed at the ISRI booth.

Winners must pay for their items at Convention Registration. Payment can be made by credit card (Visa, MasterCard, and American Express), cash, or check. Winners may claim their items at the ISRI booth until 5 p.m. on Wednesday, April 6 or by noon on Thursday, April 7.

Recipients may take their item(s) with them or have them shipped following the convention. There will be a 15% shipping fee if recipients want their items shipped post-convention. Winners who are not present at the end of the auction will be contacted by ISRI staff. All winners have until 5 p.m. EDT on Friday, April 29 to claim their prizes and arrange payment. Items not claimed by April 29 will be awarded to the next highest bidder who will have five working days to arrange payment for the item.

ALL SALES ARE FINAL. ISRI offers no warranties as to the quality or value of the items purchased. Winning bids may be tax deductible to the extent they exceed the fair market value of the item. Please consult your tax advisor for details.

More items can be seen at the RRF Silent Auction Booth adjacent to the ISRI Booth.

Harris

SHREDDERS

At Harris, we're relentless in our commitment to provide the safest and cleanest operating shredding systems in the industry. Fully engineered, manufactured, and assembled in the USA, each is a reflection of our tradition and our values. They're more than tough, they're trustworthy, and every pound of scrap proves it
—Day In. Day Out.
